EDUCATION

National Institute of Technology Delhi — New Delhi, India

B.Tech in Electrical Engineering

2023 – 2027

The Srijan School — New Delhi, India

Senior Secondary

Completed June 2023

WORK EXPERIENCE

Software Developer Intern — Itomata LLP

June 2026 – July 2026

- Engineered an end-to-end LLM orchestration pipeline using Python, Flask, Gemini, OpenRouter, n8n, OCR, and PyMuPDF to convert unstructured educational content into structured learning resources.
- Designed prompt engineering and AI content generation pipelines to produce knowledge graphs, mind maps, quizzes, summaries, and contextual multimedia recommendations for adaptive learning.

Summer Intern — DEAL DRDO, Dehradun | 

June 2025 – July 2025

- Analyzed 50,000+ time-series records from the NASA Prognostics Li-ion Battery dataset (Kaggle) using Python, performing data cleaning, feature extraction, and exploratory data analysis to identify battery degradation patterns for SoC and SoH estimation.
- Built an automated evaluation pipeline to compare predictive approaches using cross-validation, RMSE, MAE, and R^2 , enabling data-driven model selection and reducing SoC estimation error by up to 18% across charge-discharge cycles.

PROJECTS

RecruitAI — AI Resume Intelligence Platform | 

- Built an AI-powered resume screening platform using **FastAPI**, **Sentence-BERT**, and **FAISS**, processing **100+ resumes** per batch with 384-dimensional embeddings for semantic candidate ranking.
- Developed a **RAG-based recruiter assistant** enabling natural-language search across candidate skills, projects, education, and experience using vector retrieval and LLM-powered responses.
- Automated resume parsing with the **Gemini API**, extracting structured JSON profiles and implementing Python-based validation for employment timelines to eliminate LLM-generated inconsistencies.

Smart Expense Tracker |  | Live App

- Designed a full-stack expense management platform using **Django**, **DRF**, **PostgreSQL**, and **Google OAuth 2.0**, enabling secure multi-user income and expense tracking with automated transaction categorization.
- Implemented a rule-based budgeting engine with SMTP email notifications for spending threshold breaches, reducing manual expense monitoring by **60%** while delivering real-time financial alerts.
- Developed RESTful APIs and an interactive analytics dashboard providing monthly financial reports and category-wise spending insights, optimizing PostgreSQL queries through indexed schema design.

TECHNICAL SKILLS

Programming & Data Analysis: Python, SQL, C++, JavaScript, Pandas, NumPy, Excel, EDA, Data Visualization, Matplotlib, Plotly, SQL

AI & Machine Learning: Scikit-learn, TensorFlow, XGBoost, NLP, RAG, Prompt Engineering, LLM Applications, Embeddings, Vector Search, Gemini API, OpenRouter

Backend & Databases: FastAPI, Flask, Django, REST APIs, PostgreSQL, FAISS, n8n, Workflow Automation, OCR
Developer Tools: Git, GitHub, Docker, VS Code, Postman, CI/CD (GitHub Actions), DSA, OOP

ACHIEVEMENTS

Selected for Amazon Machine Learning Summer School 2026, a competitive program focused on Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), and Responsible AI.

Solved **200+** Data Structures & Algorithms problems across **LeetCode** and **TakeUForward**.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Training & Placement Cell, NIT Delhi

Dec 2025 – Present

Database Head

Unnat Bharat Abhiyan (UBA) Cell, NIT Delhi

Aug 2025 – June 2026

General Secretary
